

Non-Latex Diaphragms & Cap

Milex Silicone Diaphragms

Patented Wide-Seal silicone design provides increased suction action minimising the risk of the diaphragm dislodging during intercourse. The silicone used is hypo-allergenic, does not absorb odours or secretions and may be autoclaved. Silicone also tends to be more durable than rubber/latex. Two versions are available, the Omniflex (coilspring) Drug Tariff Type B and Arcing style Drug Tariff Type C. Each is supplied with a carrying case and illustrated instructions.
